MOVMAX SLIDER

DOUBLE MODE USAGE

SLIDER MODE

The unique ultra-precise surface processing technology allows the contact surface of the core components to be mirror-like, making the hand feel smooth and lubricating. The main body of the slider is made of metals including but not limited to 7075 aviation aluminum alloy/carburized alloy steel/copper, processed by CNC.

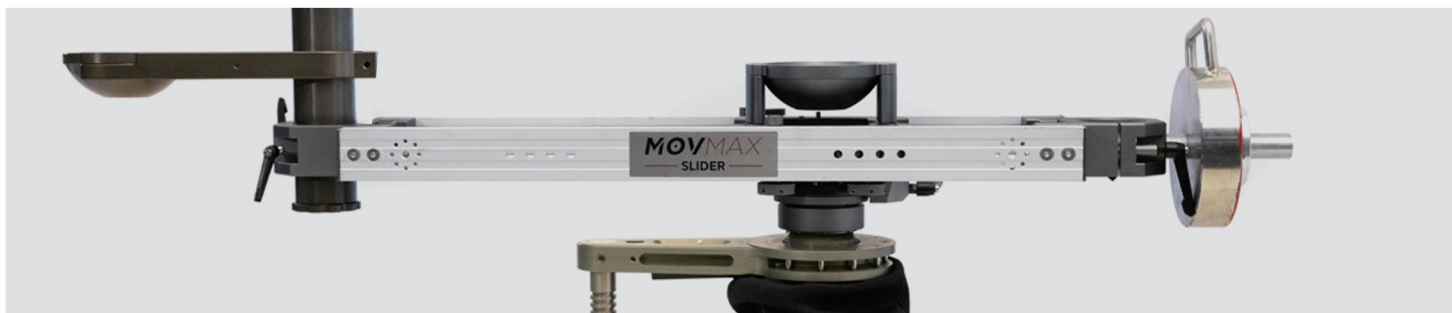

Both Side Light Stand

Tripod Middle Stand

BANGI MODE

Through the 360 multi-function adapter, by using the 80mm euro mount adapter (female) and euro mount adapter (male), the users can directly and quickly attach the Movmax Slider to the supporting tripods, dollies rigs, to complete the slider and bangi mode switch.

AIR SHOCK ABSORPTION

N₂ARM

AIR SHOCK ABSORPTION

CLOSED PROTECTION

EXTREME LIGHTWEIGHT

N2 ARM SHOCK ABSORPTION SERIES

TECHNICAL SPECIFICATIONS

SIZE	690*355*392mm
PRESSURE RANGE	0-300Pa
PRESSURE RECOMMEND	200Pa
OPERATING TEMPERATURE	-35℃-80℃
NET WEIGHT	10.15kg
MAXIMUM CAPACITY	40kg
MAXIMUM LENGTH	300mm
PACKING WEIGHT	19kg

FEATURES

- Aviation Grade Alloy CNC Body
- Suspension Shock Absorbing System
- Super Durable Roller Bearings
- Hydraulic Air Pump, 0-40kg Payload Variable
- Semi-Closed Structure
- Unique Patent Designed, Suitable For Single Person Installation

AIR SHOCK ABSORPTION CAR SHOOTING SYSTEM

N₂ARM MINI

MULTIPLE CONNECTION METHODS
SUITABLE FOR A VARIETY OF SCENES

Air Shock Absorption System

N2 Arm Mini uses 0-140Psi air shock absorber with multi-grade adjustment of rebound damping, which is convenient for rapid adjustment under different weight

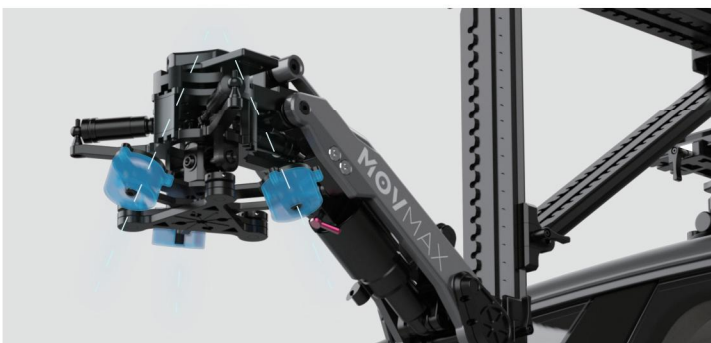

Star Vibration Isolator

The horizontal damping head adopts star mode engine, works with three hydraulic cylinders to balance the horizontal shake and inertia of the stabilizer

Suspension Damping System

The damping tank is made of silicone rubber to block the high-frequency vibration of the picture.

TCA System

N2 Arm Mini changes the damping working direction and working stroke through the turning point and pull rod to absorb large vertical vibration

ALL-TERRAIN RICKSHAW

www.movmax.com

MOVMAX ALL-TERRAIN RICKSHAW

ALL-TERRAIN RICKSHAW

FEATURES

- Modular design, 4 modes for your options
- Tire quick-release design, more disassembly mode conversions
- All terrains compatible, professional for various filming
- Adjustable steering torque, adapt to different road conditions and transitions

ALL-TERRAIN COMPATIBLE

Optional terrain tires can be selected to fit different scenes

Standard Kit 150kg Payload

Strong Compatibility, adapt to a wide range of terrains and road conditions

Sand Wheels kit 220kg Payload

Easy and stable to use in sand or under extreme payload

Spoke Wheels kit 150kg Payload

Low resistance for fast push and movement

Rail Wheels Kit 220kg Payload

Easily switched to light or heavy rails, quite stable movement and fast transition

MOVMAX ALL-TERRAIN RICKSHAW

FEATURES

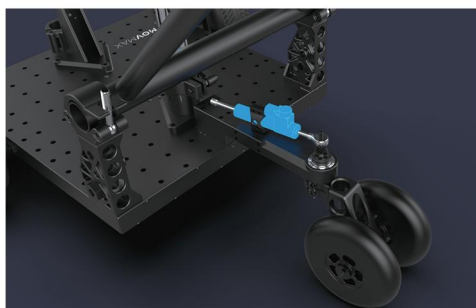

Modular Design

Full modular design of the base plate, easy to assemble and replace accessories

Tire Quick-release Design

Quick tire replacement by one person, adapt to different road conditions

Adjustable Steering Torque

Eliminate the jitters of universal wheels, adapt to different payloads and road conditions

Adjustable Seat Design

Adjustable seat fits different height and payload

Detailed instructions of the assembly method on the base plate

Detailed installation tips for different templates for fast assembly & transition

MULTIPLE DEVICES ERECTION

N2 ARM Series Compatible

Support N2 ARM and N2 ARM MINI, achieve efficient transition with the gimbals

Slider Series Compatible

Support MOVMAX Slider series, quickly switch the slider build position

Steadicam Compatible

Rickshaw carries all weights, filmmakers can focus more on images

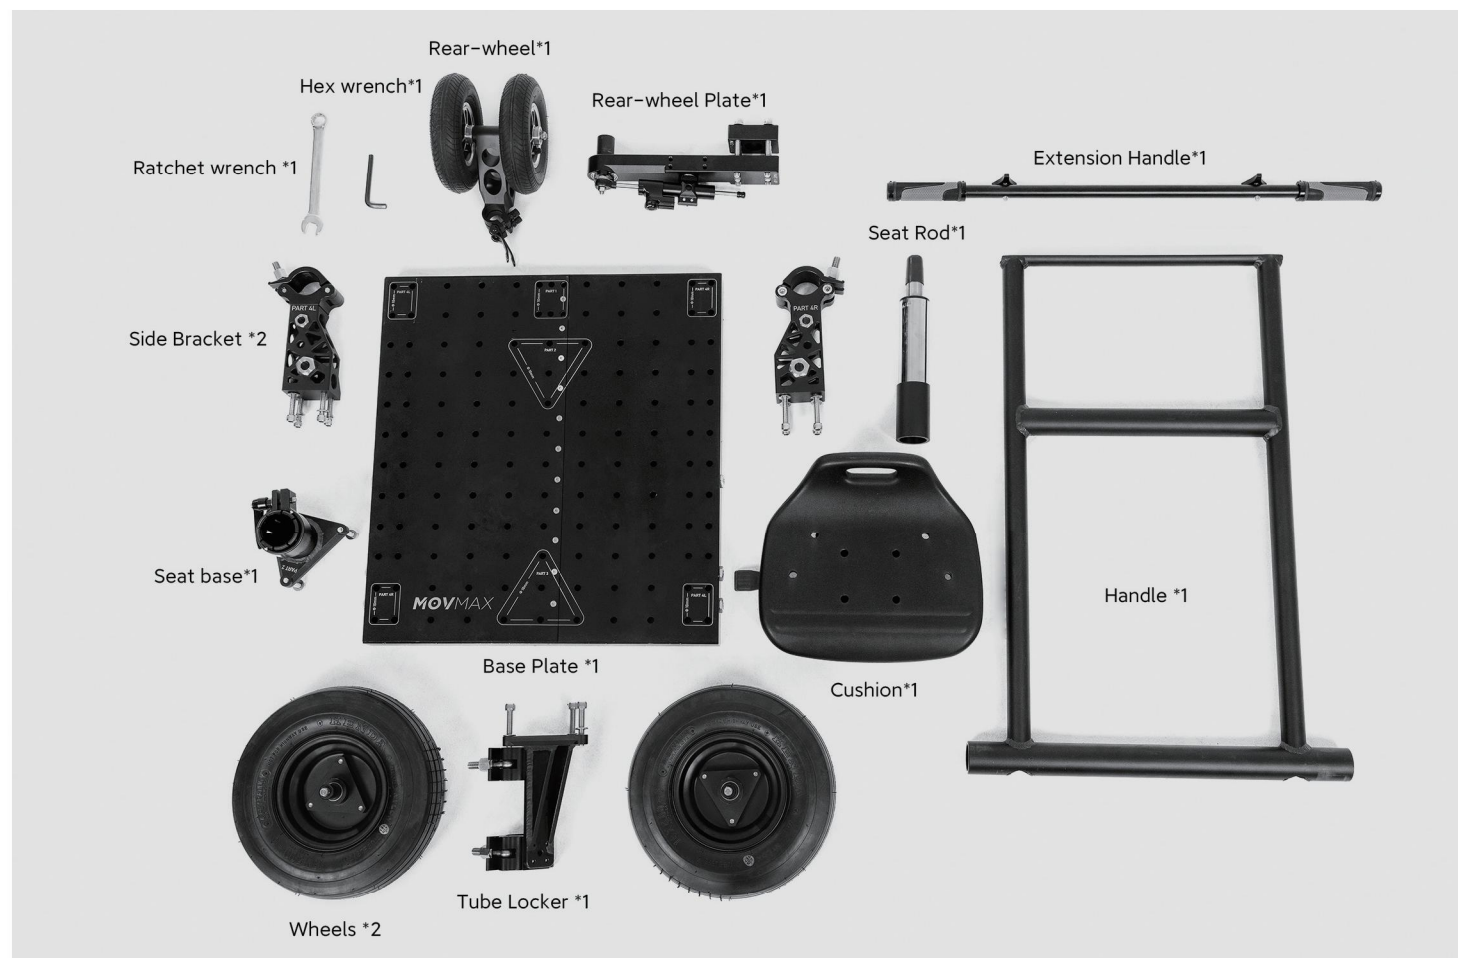

Jimmy Jib Compatible

Easy to switch compositions even with heavy loads

MOVMAX ALL-TERRAIN RICKSHAW
